Stopping Comet takeover of NCSA Telnet

(CHANGE WITH BEAR ACCESS 2.0 UPDATE)

If you prefer to continue working with NCSA Telnet rather than using Comet for telnet sessions, do the following to block the update service from downloading the Comet-NCSA placeholder.

1. Find the Bear Access *f* folder on your disk.
2. Inside Bear Access *f* there is a folder called dataComet.
3. Inside dataComet there is a folder called dataComet-NCSA.
4. Inside dataComet-NCSA there is a file called Comet-NCSA
5. Replace Comet-NCSA with a file of the same name which can be found on the Computer Center AppleShare server. The replacement can be found in
Software:Communications:Comet-X Placeholders
