Microsoft® Office 98 Updates

Combined Updater for Office98

Office 98 Update for Mac OS 9.0

Updaters for Microsoft Office 97 can be found on

AES.Geneva:Computer Centre:CC:Software:Miscellaneous:Microsoft Office 98 Updaters
This folder has two updaters for Microsoft Office 98. At least one of these is needed on all Macintoshes running Microsoft Office 98.

For Mac OS 7.x or 8.x:

1. Double-click on “Combined Updater for Office98”. Do not run the other program on your Mac as it isn’t needed.

For Mac OS 9.0:

1. Double-click on “Combined Updater for Office98” and follow the on-screen instructions.
2. Double-click on “Office 98 Update for Mac OS 9.0” and follow the on-screen instructions.

Microsoft’s notes for “Combined Updater for Office98” are given below:

The Combined Office 98 Updater (6.4MB) [March 27, 1999]

Microsoft has combined four previously released patches (See below #1 to #4) into a single easy download.

#1 The Office 98 Unwanted Data Issue (4.5 MB) [July 17, 1998]

The ‘Office 98 Unwanted Data Issue’.

#2 The Office 98 Updater for Mac OS 8.5 (4 MB) [October 15, 1998]

Updates for Mac OS 8.5.

#3 The Microsoft Office 98 Unique Identifier Patch (2.7MB) [March 27, 1999]

The Microsoft Office 98 Unique Identifier Patch addresses privacy concerns regarding the insertion of a unique identifier number in Office 98 documents. Once applied, the patch prevents Office 98 applications from inserting a unique identifier number into Office documents. This patch also applies to standalone versions of Word 98, Excel 98, or PowerPoint® 98.

#4 Memo-Resume Wizard Problem (543 KB) [March 30, 1998]

An early user of Microsoft Office 98 Macintosh Edition has identified a problem with Microsoft Visual Basic® for Applications (VBA), which can affect Office 98 or other applications that use compiled VBA code.

Microsoft's notes for "Office 98 Update for Mac OS 9.0" are given below:

This Microsoft Office 98 Updater addresses two issues: creating and editing charts in Microsoft Excel and Graph on Apple's Macintosh OS 9.0, and printing from PowerPoint to an Epson 740 printer via the USB port.

Excel

In Excel and Graph on Mac OS 9.0 the Format Chart dialog is incorrectly displayed, making it difficult to create and edit charts.

PowerPoint

In PowerPoint, printing to the Epson 740 printer via the USB port gives an "out of memory" error with no document printed.

The following files have been updated:

Microsoft Excel
Microsoft PowerPoint
Microsoft Graph
